(TMI Focus, Vol. XI, No. 2, Spring 1990)

OUTREACH KUDOS

by Maxine Lorence
GATEWAY OUTREACH Coordinator

As we stand at the beginning of a new decade, shortly before the millennium, it is of value to note the importance of the *GATEWAY OUTREACH* program, and the contribution to human consciousness that all of our trainers are making. There are 70 *OUTREACH* trainers as of this writing. They are training TMI workshops using Hemi-Sync technology in 25 states in the USA, plus three provinces in Canada, and we are represented in England, Australia, The Netherlands, and West Germany. After our next Trainer Seminar, we expect to expand our international reach to the Far East, Greece, and Switzerland, as well as additional states on our USA roster. The Institute is making a difference in many people's lives all over the world through these marvelous trainers.

As a body and individually, they have wonderful stories to tell of the many types of transformations that are possible when training this technology in a normal community setting rather than in the specific atmosphere and intensity of the Institute's Center. The stories are remarkable, funny, warm, and human—some full of wonder—the kinds of experiences you would expect from a group of people who have given a portion of their lives to this unique work, work in which one receives as much or more than is given.

So to Geoffrey in Calgary, Ellen in Atlanta, Gini in San Francisco, Brigitta in Hamburg, Mark in Phoenix, Bill in Ottawa, Allessyn in Manhattan, Richard in Wichita, Connie in Cincinnati (all of whom have earned recognition as GO Trainer of the Quarter for their tremendously successful efforts), and all the other trainers who are sharing our wonder with their world —BRAVO!
